

Site Services Engineer – Carpenter

DEPARTMENT: Site Services

ABOUT THE ROLE:

The Site Services Engineer will maintain the fabric and condition of buildings focusing on Carpentry. This is a varied, reactive role that at times may deal with difficult and sometimes high-risk situations.

The Site Services Engineer will maintain building welfare to ensure staff have a safe place to work. It is vital that the building maintenance is conducted on time and to the highest of standards for the business to run efficiently; will contribute to the work of the department in order to support continuous improvement whilst supporting the celebrations of local successes.

RESPONSIBILITIES:

- Provide technical input into maintenance work, sometimes crossing functional boundaries
- Work within a workshop or factory environment, sometimes working in noisy, dusty, oily environments, at height and outside in all weathers. The use of PPE is essential.
- Act and behave in a way compliant with all Numatic International company guidelines and policies, especially those relating to Environmental, Health and Safety, Security, ethics values and codes of conduct.
- Be reactive by providing remedial repairs and renovations on complex building requirements.
- Conduct all planned maintenance on time and to the highest of standards.
- Communicate with supervisors and managers, providing feedback on learnings to foster an environment of continuous improvement.
- Ensure that health & safety practices, legislation, and company procedures are always adhered to.
- Follow and work with detailed diagrams, plans and drawings.

ABOUT YOU:

- NVQ level 3 qualification in Carpentry or relevant knowledge through work experience.
- Experience working in a manufacturing environment.
- Experience of both planned and reactive maintenance.
- Demonstrable experience in Carpentry
- Excellent communication skills, ability to communicate verbally.
- Ability to provide technical advice and guidance within area of expertise.
- In depth understanding of relevant regulations, within area of expertise, with ability to interpret technical documentation.

Closing Date: 28/06/2022

SALARY: £27,000 - £33,000 p.a DOE
